## SUMMARY

---

**Front-End Software Engineer** with 3+ years of experience delivering exceptional web applications in both startup and enterprise environments. Expert judge for a major national tech award and published author of academic papers on front-end development. Proven track record of building large-scale solutions from scratch, driving technical innovation, and leading projects to deliver outstanding business results.

## SKILLS

---

<b>Programming Languages</b>	TypeScript, JavaScript (ES2015+), HTML, CSS, Sass (SCSS), PHP, Python
<b>Frameworks &amp; Libraries</b>	React, Next.js, Redux (Redux Toolkit, Redux Saga), Styled Components, Node.js, Storybook, Framer Motion
<b>Tools &amp; Technologies</b>	Git, GitHub, GitHub Actions, Webpack, ESBuild, Jest, Figma, Docker, Jira, Vercel, REST API, WebSockets, i18n

## WORK EXPERIENCE

---

<b>Front-End Software Engineer</b> Acquire	Feb 2022 - May 2024 <i>San Francisco, CA</i>
---	---

- Developed and launched an omnichannel customer support platform with real-time chat, video calls, and analytics dashboards, built from scratch using TypeScript, React, Redux, and Micro Frontend architecture
- Led all front-end development efforts after company downsizing, guiding development strategy, task execution, and cross-functional collaboration to achieve project goals
- Set up CI/CD pipelines via GitHub Actions, featuring semantic versioning and automated releases in a monorepo
- Influenced the company's roadmap and technology decisions through active contribution to strategic planning
- Designed and built a documentation website with Next.js for an open source side project of the company

<b>Front-End Developer</b> Business Environment (a Sberbank subsidiary)	Sep 2021 - Jan 2022 <i>Moscow, Russia</i>
--	--

- Developed a strategy and led the migration of a large-scale legacy JavaScript codebase to TypeScript, resulting in a 50% drop in production bugs and superior code maintainability
- Modernized the application build process, cutting build time by 10x and saving 400+ developer hours per year
- Organized and conducted more than 10 technical workshops, fostering a culture of continuous improvement and ensuring the successful adoption of modern technologies and best practices within the team

<b>Front-End Developer</b> Sosivio	Dec 2020 - Aug 2021 <i>Tel Aviv, Israel</i>
---------------------------------------	--

- Developed an observability platform for Kubernetes environments using TypeScript, React, and Redux, featuring customizable dashboards, interactive real-time data charts, and optimized performance for large data sets
- Achieved and maintained over 95% test coverage through extensive unit and integration tests, ensuring high code quality and reliability
- Collaborated with a globally distributed team in an Agile environment, taking ownership of major features, contributing to sprint planning, and providing critical support for investor presentations
- Created an extensive UI-Kit with Storybook to enhance user experience and development efficiency

## EDUCATION

---

<b>Bachelor's Degree, Computer Science</b> Kazan Federal University, Russia	2016 - 2020
--	-------------
